It might look like I dont have many facials on the menu...

... but it couldn't be further from the truth.

Effortless Curves creates bespoke facials that are unique to you and your skin. This creates thousands of treatment combinations with endless opportunities to create your healthiest and happiest skin possible!

I believe that your skin is as unique as your fingerprint - and so, your skin treatments should be equally personal. This is why I work with Dermaviduals: a suite of products that can be combined to create a range of personalised bespoke facial treatments. Dermaviduals have create customised skin solutions with advanced skin mimicking creams. This ground breaking engineering process makes the dermaviduals delivery process truly unique. The dermaviduals active ingredients have been proven to permeate through the skins barrier, in the most pure form, providing the most accurate and responsive delivery system leading to exceptional results.

At Effortless Curves, each facial is tailored to address your skin's individual needs, ensuring you receive the best care and results.

You get to decide how much time and money you wish to invest and working within those guidelines, your bespoke facial will be created and tailored to your skin by your experienced therapist without being restricted by a pre-set facial recipe that isn't the perfect fit for you.

Each of these facials can be custom designed to target:

- Acne • Scarring • Congestion • Dehydration

NEOLIFTING FACIAL

NeoLifting® is a holistic facial treatment that uses face sculpting techniques, Buccal intraoral massage and manual lymphatic drainage to address age-related concerns by toning, strengthening and relaxing the main facial muscles. The treatment gives a prolonged lifting effect to the face, neck and décolleté without any side effects.

The technique lies in the deep understanding of how the facial muscles work and applying this fundamental knowledge to the treatment. Work is done on the face as well as inside the oral cavity, encouraging mindful breathing techniques and manual lymphatic drainage.

NeoLifting® is producing positive results.

- Facial muscles relax and muscle tone returns to normal.
- Aids in muscle recovery and restores facial posture.
- Eliminates spasms and blockages.
- Enables metabolism and tissue nourishment.
- Appearance and elasticity of the skin improves via stimulation of skin cell regeneration and prevention of wrinkles.
